TO THE
READER.

IF thou art English, and hast well considered the mercies of God unto this Nation in 1673, by giving us such and so many blessings, as at present not any other Kingdom or People of Europe enjoy; thou must be thankful: for we only at present enjoy peace, have been made happy by a plentiful harvest to the comfort and relief of many thousand Inhabitants, who otherwise must have been starved for want of bread: We have no war at present, every man possesses the fruits of his own labour and industry; the bold Soldier neither domineers or plunders us; no enemy enters into any of his Majesties Kingdoms, to the harm or detriment of the meanest of his subjects; the Merchants Ships navigate the wide Seas to all the several parts of the world, without fear of surprisal or molestation from any Prince of Europe. What Nation can say so much? God of his great goodness and mercy continue this our present happy condition for many years yet to come. God preserve his Majesties health, and make him happy with a right understanding betwixt him and his great Council.

For the present affairs of Europe betwixt the Kings and Princes thereof, thou may'st see the wheel of Fortune, or Providence rather, is not always the same; the French Monarch by Rancounters having in this last year received some

To the Reader.

Checks, but the Event or success of War is ever doubtful; certainly we yet cannot find any determined ends of these broyles after all the wars; and in these very wars, (latet anguis in herba) there is something more than as yet is suspected, which shall give a full period; and in time manifest it self ———

For the advertisement following, it is against our present health, & fully against any desire of ours to Contention, we were even enforced to say something in Vindication of what we wrote in 1673 of the sign Scorpio, an illuminated conceited Scorpionist having contradicted all Antiquity about the signification of that sign, and abused with ignominious Epithets, all the younger sort of Astrologers, nay many of those who in the true fundamentalls of Art might be his Masters, viz. Mr. Sanders, Mr. Coley, Mr. Edlin, and many others, whose present names we remember not. ——— But we let pass all his invectives, and scandalls, scorning to answer such an impertinent person, of whose ingratitude unto us, all studious persons in Art are well satisfied.

William Lilly..

Astrological

Astrological Judgments

For the Year, 1676.

By William Lilly Student in Astrology,

WE shall in this ensuing *Anglicus* of 1676, endeavour by the mercy of a gracious God, to give a probable conjecture of such various and contingent *Actions*, as may be probably manifested from the several configurations of the Planets, from preceeding *Comets*, prodigious *Ostents*, present *Eclipses*, or Ingress of the *Sun* into the 4 *Cardinal* points of this year: At present, *viz.* in September 1675. we find the *Emperor* of *Germany* and the confederate Princes of *Germany* in armes against the present King of *France*, the *Spanish* King and the *States* of *Holland*, uniting their *Armies* and *Forces*, both of them in opposition to the *Monarch* of *France*, who only finds friendship and assistance from his present Majesty of *Sweden*. The *French* King having lately lost his old *General Turenne*: and lately the *City Treves*, and *Munster Grequi* therein, now prisoner. The *Messineses* revolted from the *Spaniard* and supported by the *King* of *France* therein, which makes us remember the irruption of *Mount Aina* in 1669, with that fury and violence as no age could parallel, as also that terrible and unusual *Earth-quake* at the beginning of the irruption, *viz.* We wrote of that very subject in 1670, and delivered our judgment; That there would be subsequent, eminent damages,

A 3

slaughters

Astrological Judgments.

Slaughters of men, Wars, Seditions, Inundations, Scarcity, Famine, Plagues and other attendant Calamitys. All which or most of these have happened already to the *Messineses*, we fear much more are behind in *Sicilia*. The present condition of *Poland* is perillous and to be pittied, having to deal with two so powerful persons as the *Turks* and *Tartars*. His Majesty of *Denmark* in hostility with the *Suede*, he with the *Hollanders*; there is scarce any King, Prince or Nation of *Europe*, but he or they one way or other ingaged, His Majesty of *England* onely excepted. May it please God to bleſs great *Brittain* still with external Peace and internal Unity, and her King with many happy years, health and a long life. *Amen*.

We cannot but admire the great providence of God, who in 1572, directed the appearance of that new Star in *Cassiopeia*, not framed of any Ethereal matter, as all *Philosophers* conceive *Comets* are; but emitted as an extraordinary Sign of some future events, in time to be manifested: for it remained immoveable for the space of one whole year or more, and was visible continually to all *Europe* all that time, giving thereby special warning of some more than ordinary *Actions* to be from thence manifested in fullness of time; and these concernments so stupendious, so admirable, as no Age or very few had seen the like in former Ages or times. However we that live in this age do see the beginning of these so great Vicissitudes and Changes that new Star was the *Prodromus* of; but the full determination of these so great alterations, wars, and desolations, is onely known to the Almighty; from mortal men we can expect but a modest conjecture according to natural causes.—It is true, there have been some *Comets* since 1572, none of any so great concernment, but that of 1618, which designed *Germany* and some other adjacent Countries, wherein for some years there was very cruel wars and much bloodshed; but those so great calamitys and wars of *Germany* cannot be the ultimate end or design of that admirable

Star

Astrological Judgments.

Star in *Cassiopeia*. The last Comet or Comets in 1664, and 1665, under whose effects and influences, all *Europe*, part of *Asia* and *Africa*, nay some parts of *America* are at present; yet the Actions hitherto do not seem to signify, that very Thing—which was intended by that new Star—*Majora canamus*—but wanting the diurnal exact motion of those late Comets, we must acquiesce—*Particularia pradicat nemo.*—

We may further observe of this or those Comets of 1664, 1665, as they had their Retrograde motion from *Libra* to *Aries*, viz. through the six northern Signs, viz. half the *Zodiac*; so since that year all or most of the Kings and Princes of *Europe*, either at present are, or have been involved formerly in the influence of those Comets; some taking part with the *Emperor*, others with the *French*.

We hear of few Princes that have stood *Neuters*, but if any, they may be adjudged very prudent persons; who in such an uncertain war have onely inspected into their own welfare, of which number happy is his most gracious Majesty of *England*. These wars began in 1672, just one hundred years after the appearance of that most miraculous Star, 1572; towards the middle of this year 1676. they will have continued 4 whole years; in 1676. towards the middle of the year, if not sooner, *Falsa est Alea*, viz. the dice will be cast, and it will be visibly apparent what King or Prince shall be absolute victor, and what party or parties these 4 continued years of wars will crown with success and victory; and upon whose Ambition the loss of so many thousand Mens lives, so many Territories, Citys and Provinces demolished or ruined, so great and vast expence of *Treasure*, spent to no purpose but of Christian blood, will be imputed. However the *Decrees* of Heaven are immutable, for after that these wars of *Europe* are seemingly ended, yet other wars and Calamities will succeed for 4 whole years next after; and from thence to ensue; we say, and may affirm, that those concernsments whether Wars, or de-

Astrologic al Judgment's.

vassations,— signified by the new Star in *Cassiopea*, they had not any Original, according to what was preordained by the New Star, until 1672. or shall have any final end or determination for these many years yet succeeding; the great work or prime cause intended from thence is scarcely yet begun. True it is the late Comet or Comets of 1664. or 1665. are *Stella* or *Cometae Adjutrices*; their influence shall excite the wrathful and ambitious natures of Great ones to begin the work, or to make the first manifestations of what may succeed, but those aspiring Persons shall not live to see the end or conclusion of what themselves so unfortunately begun. We understand the present male condition of *Poland*, and the unhappy affaires of that Kingdom, and miserable state of those Countries; the *Muscovite* warily looking after his own safety, rather than assisting the unfortunate *Polander* his now distressed Neighbour; time will occasion his Repentance, and involve him and his people in a labyrinth of distress, when he least expects it; he found Providence very gracious once unto him, let him beware a second *Rancounter* of the same nature: The *Ottoman* Emperor is not like to have any long continuance of this his present tranquillity, an inconsiderable Prince being designed to begin his vexations, which more potent Princes will continue and abett or countenance for some yeares, to the almost destruction of that now very powerful *Empire*; but this occasionally. A few words concerning the end of the Comet in *March* 1665. whose tail was eminently large and very conspicuous, of great longitude, fiery and red, inflam'd &c. which we many times observed, for it was conspicuous or apparent many daies, and towards the very end of it's appearance, looked fierce, bloody, and wonderfully transparent; whereby we may conjecture the sad consequences which will attend the last part of it's signification, by War, Fire and Sword, &c. *Quamvis Deus inferiora mutet, non tamen sine secundis causis id fieri*— although God may change inferior actions, yet he seldom

Astrological Judgments.

seldom doth it, but he manifesteth it by second causes—

We further say, that the new Star in 1572. *In primo fuit Jovialis excedens sydera prima magnitudinis* : at first it appeared of the nature of *Jupiter*, and in its greatness exceeded the fixed Stars of the first magnitude ; *deinde rufa, Martialis*, then was red, and of the nature of *Mars* ; *Quapropter totius mundi mutationem expectes, & super res diuturnas & ingentes indicans* : Wherefore it presaged a change or alteration of the whole habitable World ; and upon high and great matters, and those actions depending from thence to be of long continuance : and these great changes are the more to be suspected to happen, *Quoniam erat in octavo orbe*, it was fixed in the eighth Orb or Sphere. Now, as this new Star designed such changes, so the last Comets of 1664. and 1665. do seem to put forward into action part of such effects as were formerly signified. *Diuturnitas magnitudinem effectus indicat*, the diuturnity of the Comet declares the magnitude of the effects. And we say again, that the tail of the last Comet 1665. being totally *Martial*, doth signifie *Bella savissima & pestes diras, famemque*, most cruel Wars, Plagues very pestilent, and also Famine. Part of these are verified already in a great measure, the remaining effects will without doubt succeed in their proper times : from which God of his great mercy grant, that no further calamity, Plague, Pestilence, Fire, or Famine hereafter may befall *England, Scotland, or Ireland*.

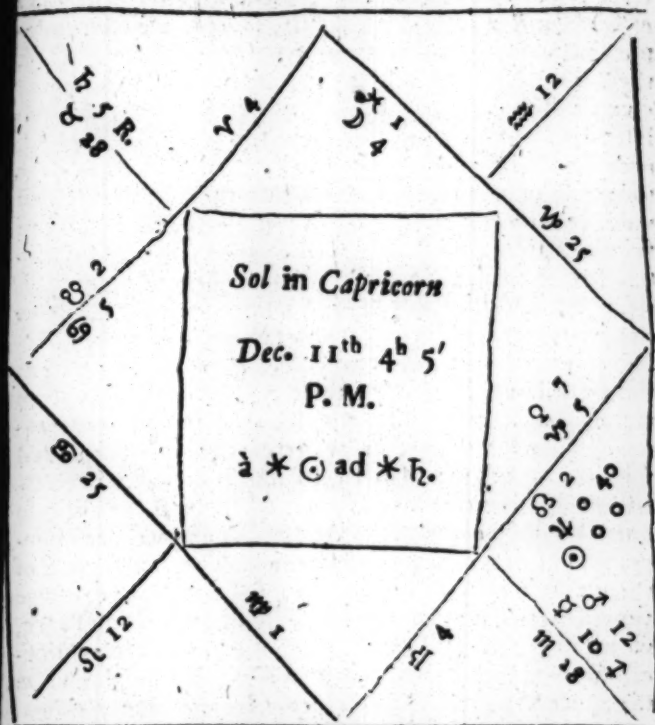

If that Relation be true, which lately came from *India*, concerning the present *Revolt* of the *Chinese* from the *Tartarian* yoke of bondage, then it cannot be doubted but many Kings or Princes in those parts will follow their example, even (as we say) to the end of the Chapter : but to our first intended purpose.

There are four Cardinal points, which Astrologers carefully observe, for the casualties and changes or alterations of every year, we begin with that of the Sun his entrance into Υ 1675. 11. of December, 4^h 5' P.M. and shall

Astrological Judgments.

shall observe what may be contingent from thence, unto the Sun his Ingress into *Aries* the Spring following 1676. *Primo incrementa & decrementa à sequentibus Aspectibus Planetarum cum Luminariis, & cum Stellis fixis, & inter se, ac juxta naturam Signi, & prout concordant aut discordant cum Cardinalionibus & Lunationibus quarterum; Wherein we consider the increase or decrease from the following Aspects of the Planets with the Luminaries, and with the fixed Stars, and amongst themselves, according to the nature of the Sign, as it shall agree or consent, or disagree with the Angles and Lunations of the quarters, viz. of the quarter either before or after Change or Full Moon, for all are to be considered. For those quarters which agree do necessarily produce the effect signified; but where there is a discrepancy, the matter is doubtful and clouded: so that sometimes we may judge of rain, when there only succeeds moist dews. This is further observable, that when the Stars do agree in nature with the quarter of the year, as *Venus* with the Spring, the Planet *Mars* with the Summer, *Saturn* with the Winter, *Mercury* with the Autumn, they increase the decrees of that quarter of the year according to their fortitudes. But however it is a most judicious way for every Artist to consider, whether there was any Comet, or Blazing-star, or great or minor Conjunction of the three superior Planets, or of two of them, did precede the Sun his Ingress into any of the four Cardinal points, in such cases he doth well to consider what Sign, and in what Asterism that late Comet or Conjunction of the Superiors was in, though it preceded the Ingress some months or weeks before.*

The Schemes both of the Ingress and preventional Lunation are the same, *Venus* in both figures is Angular, and by position in the 7th house, the Moon in the M. C. *Mars* and *Mercury* in the 6th house. *Haly*, pag. 392. writes of *Venus* her position thus; *Si Venus fuerit in septima, & ibi fuerit fortis & potens, in illo anno diligenter homines mulieres, & contrahent conjugia, & nuptias multas celebrabunt,*

Ex illa parte multa gaudia & fortunas bonas habebunt, viz. When Venus is in a Revolution posited in the 7th house and there well fortified, in that quarter men shall love or delight in Women, contract Marriages, celebrate many Nuptials, and thereby have much comfort and great fortunes.

Of the same Judgment is Bonatus, pag. 578. Si Venus fuerit in septima, significat conjugium & gaudium ex parte mulierum: If Venus be in the 7th, there is denoted Marriages and great rejoycing on the behalf of Women: of the Moan her being in Medio Caeli, Haly 374. Si Luna fuerit in decima,

Astrological Judgments.

cima, erit populus in bono statu & honoratus, & eum honorabit et laudabit Rex, et Domini qui diligent eum, viz. The people or Commonalty shall be in good state and respected, the King and great Lords or their Rulers shall honour and commend them, and love them. We hope this or such like blessings will have place upon the people of *England*, upon his *Majesty* and great *Council*— We do more fear the sicknesses of this season and quarter than any very hard weather or any Marrial affairs; nor do we find the dispositions of men much inclinable thereunto; the sad calamities or many miseries which very many brave resolute Spirits endured or suffered in the Summer preceding, seems to have quieted their extravagant Spirits, and their former too much inclination to War. Here we find *Mars* in the sixth house, many of these *Heliorian* persons seem maimed, wounded, under cure for their limbs, many are petitioning for their Pay or Arrears, with perplexed minds, and dissatisfied souls, to find themselves neglected in their so great necessities, so slighted for their so much hardship endured for the honour and welfare of ingrateful Princes or Commanders, which occasions many of them rather to mutinies than to fight. And yet divine providence seems not as yet to intend any present Peace, we mean general, notwithstanding the Wars have continued more or less almost full four years; but of this upon the figure of the *Suns* Ingress into *Aries* and other *Cardinal* points; we shall now hint at the present sicknesses of this Winter-quarter, which are probably like to be many, and those dangerous, many of them mortal, partly occasioned from the male temperature of the Summer preceding, and sad influences then predominating, and from those more forcible Configurations succeeding the Autumnal Ingress in and towards the latter end of *October* 1675. whereby Mankind is like to be afflicted with these distempers or sicknesses subsequent— viz. infirmities in the Liver, whole Breast, Ribs, Spleen, Pleurifies, dangerous Coughs, even to the strangling of many who suffer by such Diseases, many

Astrological Judgments.

12
y shall be afflicted with *Sciatica's*, a desperate torment
very rarely perfectly cured, if the distemper once infect
the bone; this will most afflict the Souldier, by reason of
his former ill Diet, but especially cold Lodging in the Air
and upon the ground— As the Sign *Scorpio* is upon the
Cusp of the 6th house in the preventional Lunation and Fi-
gure of the Ingress into Ψ , here are denoted unhappy Fi-
gure's, with maladies in the Privy members, with the
stone, gravel in the Kidneys and Bladder, with the Piles
or Hemorrhoids, many with the *French Pox*, some with
Fluxes of blood in the inferior parts, many by the infir-
mities of their *Lungs* and their inflammations, *Apoplexies*,
Quinzies, passions of the Backbone, Cramps, defects and
inflammations of the Liver, &c. Tertian and quotidian
Fevers, *Faundies*, both yellow and black, Frenzies, Mad-
ness, running Gout, &c. As for the general Affairs of
Nations, the Common-people or Subjects of many *Princes*
in transmarine parts generally dissatisfied, their Princes
much impoverished, many considerations or secret con-
sultations are on foot how to meliorate their miserable
condition; but no perfect Expedient as yet can be found
out, or yet any sensible agreement in the resolution of
those who strongly endeavour by all art and industry to
reconcile differences, or to give conclusion to the lamen-
table afflictions of almost all *Europe* and her distressed In-
habitants.

Oh happy England, be thank ful for thy plenty, for thy pre-
sent Peace, for all the mercies of a gracious God bestowed upon
thee: pray for his Majesties long life and reign. Few or not
many of our animadversions belong unto thee this year,
and so we would be generally understood. As for the
inclination of the Weather, there being no strong Confi-
gurations to the contrary, it is for the most part signified
by *Venus* and the *Moon* her application to the superior and
inferior Planets: *Venus* for the most part signifies moist
Weather, rain, snow, sleety weather, and not harmful to
Mankind.

Signs

Astrological Judgments.

Signs *bicorporeal*. or of double signification, make the four *Angles* of the ☉ Ingress into ♊, just like the present juncture of general Affairs in most Nations of Europe. *Aldebaran*, a fixed Star of the first magnitude and nature of *Mars*, culminates with the very degree of M. C. having South Latitude, but within the *Orbs* of the *Zodiack*. *O* you great *Princes of Europe*, be careful of rash adventuring your persons in this year, for fear of sudden casualties or calamities when least suspected, &c.

Cor m another fixed Star of the first magnitude and nature of *Mars* and *Jupiter* occupieth the Cusp of the 4th house; how many Towns, Forts, Cities or Castles are like

Astrological Judgments.

to be surrendered or captivated, some by *Treason* or *Civil War*, for ♃ is no fighter, others by storm, some and those few by *Treaties*, the World is turning round; 1673. is past and gone —

Mercury is Lord of M.C. posited in the 8th viz. the house of death, *Retrograde*. Once more, *Oh ye Potentates of Europe*, be cautious of surfeits, hard riding, and falls in this year ensuing — *Valete*. Judgment is wholly in this Quarter derived or manifested from the *Ingress*, neither preventional or postventional *Duration* signifies any great matter. Both the Actions generally and the Consultations near this time, are signified to be carried on with much violence and passion, with much tergiversation, ambiguity, fears, and jealousies, many persons intrusted with publick Affairs at a stand, not able either to give or receive wholesom advice, such do the present times seem to be. The Planet *Mercury* being Lord of the *Ingress*, and not beholding the Ascendant, many would concern themselves in things not belonging to their Sphere or condition, such are troublers of *Israel*, viz. of that Country where they live, whereupon *Mortalitates & occasiones mortales inter eos*, from whence Mortalities and mortal occasions happen amongst them, time will best manifest the meaning of this *Apophism*. Besides, if the Lord of the year be in *debilitatibus & infortunio*, *judica quod annus ille erit malus, & homines in eo anno malos status habebunt*: The ill position of *Mercury*, he being weak and unfortunate, is an argument the year will be evil, and mens minds prone to evil manners, and their conditions and estates as bad. Some reason is given by Authors, why the vulgar or ordinary man should be so stubborn or of such evil nature or manners — *Quia inveniunt homines distributionem a suis dominatoribus, & deprimuntur ab eis, eritq; annus contrarius sapientibus atq; ingloriatoribus*: viz. The people or generality of men shall suffer many incumbrances from those who rule over them, shall be held under or depressed by them, and it is like to prove a contrary year to many Wise-men

Astrological Judgments.

Wise men, or so reputed, who may suffer much, as also the
 such as have employment by *Factors* or in *Factories*,
 unto *Merchants*: unto Wise men by being discarded of
 and beneficial Offices; unto *Merchants* by untrusty Agents
 or *Factors*, by losses at Sea and Bankrupt Creditors. The
 Kingdom of *France* and the Monarch thereof, very much
 concerned as to his Subjects, who may more actually man-
 age their Actions in this, than in the last years: but con-
 cerning *Factors* and declining Creditors, we judge the
 noble City of *London* much passive therein. However
deharan in M. C. manifests the downfall of many persons in
 great places or Dignities, when least by them expected
 or suspected; some probably scandalized, or their actions
 rendered worse than they are or were, others upon
 special and just grounds and manifold misdemeanors
 some for occult Offences not to be discovered; for it is
 further observed, as *Mercury* is in the 8th house, significat
contentiones quæ cadunt inter homines, causa rerum jam pro-
teritarum; quæ renovabuntur inter illos, & quæ accident in
amicitiis ex vicinis & ex parte vicinorum, quæ vitæ aut
quam potest evitare, & dicent mendacia & puz. here are sig-
 nified Controversies which will fall out amongst men, for
 matters and things long since or of late acted, which now
 shall be reiterated or renewed again, and that such enmi-
 ties or contentions shall arise from information of Neigh-
 bors, by whose means or setting on, these differences shall
 hardly be ever reconciled or any ways avoided, though
 effect the original cause of these afflictions was meet
 false and untrue. What is here said of the vulgar man
 and his or their actions, will also have signification in the
 effects or affairs of the *Grandees* of Nations, if not more
 fully and to more purpose in the Courts of Princes, and in
 the principal Magistracy of Cities and Towns, wherein there
 is like to be much controversie about the Priviledges,
 Customs, and Usances betwixt the superior Officers and
 inferior persons of that Commonalty.

In our Vernal Figure, we find *Cauda Draconis* in M. C.

and

Astrological Judgments.

and in *Gemini*, significat quod exultabunt rustici & calcitrabunt, & salient contra Gubernatores, & quod deludent eos, & insurgent contra milites atq; divites ejusdem nationis atq; Vicarios, Bonatus 389. The Position of *Cauda Draconis* in *Gemini* signifieth, that the Clowns or vulgar ordinary sort of people will endeavour to exalt themselves, and kick or wince or make sport with their Superiors, will make insurrections against the Souldiery, Rich men or men in Authority, or such as should govern them.

France is subject to the Sign *Virgo*, which in this Ingress is the Ascendant of this Vernal figure; we fear that *France* may be molested with such accidents, before the year 1676. be ended: and so may also some other Principalities, yea perhaps *Spain* it self in some of its *Provinces*. In 1675. *France* was subject to some gentle Mutinies, but those at that time were pacified without much or any blood: we leave the further event hereof unto time, which best and only discovers Truth.

In many other Countries, we do probably conjecture will arise Revolts, Mutinies, Insurrections, discontents, repining and dislikes of the present juncture of Affairs: but so long as his present Majesty of *England* and his Subjects are at quiet and in peace, or not concerned herein, let the *Aphorism* take place where it will, and in what Kingdom or Nation providence shall order it.

For as *Cauda* is in the 10th significat impedimentum Magnatum, & diminutionem honoris eorum seu dignitatem, viz. Nobles, great Persons will find a diminution or lessening of that honour or esteem they formerly had, as also many impediments in their affairs; for *Mercury* is Retrograde: people will be apt to misreport or scandal their Superiors, apt to believe false matters against them, now one thing, then another, never contented, nor do they know any lawful or just cause or reason for these so great disturbances, which they so maliciously give to the Magistracy of those Places, Countreys, or Corporations they live in. But sith these *Mercurians* or Make-bares their significator is Retrograde,

Astrological Judgments.

grade, and he in the 8th house and in a moveable Sign, we cannot apprehend any mischief more than verbal, or some slight Pamphlets, or unadvised Petitions: we do not perceive England in any danger from such disorders. *Mercurius in aspectu Martis in exordio anni, mortalitates significat, vel in aliqua parte anni in Signo igneo, validos ventos et ignes; Mercury in the beginning of the year, or in any other quarter of the year in a fiery Sign, and in Aspect to Mars, signifies mortalities, strong winds, and fires very frequent.* We pray God, that the honourable City of London may be in no danger of this signification: and the rather, because in this year, not only the Dragons transits the Sign Gemini; but also there will be a Solar Eclipse in the Ascendant of London: but we well hope that the wise and prudent Governours or Magistrates thereof, by their wisdom and care, will prevent any occasion whereby the peace and tranquillity of the City might be disturbed.

We find ♄ in ♋ a fixed Sign in Trine Aspect to the Ascendant, but in a cadent house, from hence *Penuria arborum atq; detrimentum ex vermibus, qui cadent in eis erunt tribulationes, & injuria, & tremores, & terra-motus, & civitatum destructiones, & domorum & villarum; viz.* he signifies great detriment to Fruit-trees, by reason of Worms or such like Vermin or Caterpillers, which shall descend upon them; great will be the tribulations or afflictions of many Countries, many Cities, Villages, and Houses fired and destroyed; nay, it is confirmed by experience, *Si fuerit Saturnus in Tauro in revolutionis hora, quaelcumq; Ascendens fuerit, significat guerras, & famem, & terra nascentium carissiam, viz.* If ♄ be in ♋ at the hour of any annual revolution, let what Sign soever ascend, he signifies Wars, Famine, and scarcity of Provisions. We remember in this last year, a person of good quality lately come out of Ireland, related, that in 1674. the year after the last new Comet appeared in Aries, and thence passed into Taurus, that there was in Ireland a very great mortality

lity and destruction of their Cattel, and that in or about the month of *October* (if we remember right) at *Arbol* in that Kingdom, in one Market-day, about three hundred hides of beasts sold, which died of the disease then raging amongst the Cattel. Nor are we ignorant of the great devastation of Cattel in *Somersetshire*, by reason of scarcity of Winter-provisions for them: and we have likewise received good information, that many people and much Cattel perished in some of the Northern Countries of *England* this last Winter, to the great harm and utter ruine of many good Families, by loss of their domestick Cattel, for want of timely sustenance both for them, and also of food for themselves. God divert the remaining part of that last *Comets* signification and male influence from all his Majesties Territories, Kingdoms and Countries, both at home and abroad. We have been also informed of some design in *Barbados*, against the *English* by their *Barbarian Negros* and *Slaves*, but by Gods mercy happily prevented. Some relations have also been made of the slaughter of many *English* in *New England* by the old Natives; but we hope those murtherers will in due time be sufficiently chastised by the wary new *English*. Some petty disturbances appeared in this preceding Summer in *London*, but happily prevented without much or any blood: from hence we may clearly demonstrate, that *Comets* do not appear in vain, or without effects succeeding; for as the Comet did appear in *Aries*, it signified *England* and the Eastern or North-east parts; as it did transit γ , it represented *Ireland*, *Poland*, &c. as it was in δ , it signified four-footed beasts, *Oxen*, *Cows*, &c. and scarcity of grain, of which want most of the Counties of *England* complained; we might expatiate, *Non modo experientia, sed demonstrativa ratio suadet Cometam super inferiora valere plurimum*: so that not only common experience, but demonstrative reason may persuade and evince, that *Comets* have very great influence upon inferior bodies. We write these animadversions the rather, that *Posterity* may have a perfect account of such casual-

Astrological Judgments.

ties as were subsequent to the Comet which last appeared in *Aries* and *Taurus*, the account we had of that Comets motion, or so much as we printed, from that civil and judicious person Mr. Worley of *Petersfield*; *Quocirca casus autem fieri corpora tam magna, et tanta admirationis, furor est putare*: It is therefore a madness to think that such like appearances or Comets come by chance, which occasion such admiration, and are the *Prodromi* of such calamitous events.

As H is in the 9th house within the *Orbs* of the Quadrature of *Mars* in a Sign fixed, and the sixth house, you shall hear what thereby is signified; viz. *Diminutionem fidei, et ablationem misericordiae atq; pietatis, et studebunt homines quidem in vilibus et horribilibus, verum alienarum, et significat mœrores ac tristitias et anxietates venturas itinerantibus in peregrinationibus suis, et longam moram in eis*, viz. a diminution of faith, or people less religious than formerly, matters of faith laid aside, or less belief in promises, or Treaties or sacred Oaths than ought to be, little mercy or compassion to the poor or distressed, men will more delight in base and horrible Actions than is requisite, and be meddling or busie in other mens affairs without any reason or cause, from whence ensue great sorrows, anxieties, or afflictions; much hardship and many perils to those employed in long Voyages, or unto *Itinerants* by Land-journies, many who think to make short voyages shall be disappointed in their expectations, and continue abroad longer than could be expected, to their great damage and hindrance. The Planet *Jupiter* is weak, by not having any essential dignities or fortitudes where he is, viz. in the 5th house; but in his fall separated from a Trine of *Saturn* since his entrance into ψ . From hence a probable conjecture or construction may be framed, viz. That Wheat and such grain as mankind feeds on, and by it is nourished, shall be plentiful, and the prizes low; for as in 1675. γ being in *Sagittarius* his own house, did fore-shew the high price it was sold for, viz. 8 s. 7 s. a bushel, &c.

Astrological Judgments.

ke, more or less as the goodness of the grain was; so now Ψ being in Ψ , declares the small price that grain will bear in 1676. But as Ψ is in the 5th house, *significat incrementum filiorum, & bonum esse ipsorum, & quod non erunt abortivi in anno illi, (nisi aliqui fortè casuales)* & significat bonum esse Divitum & Magnatum atq; Nobilium, & utilitatem rerum de quibus habent homines fiduciam in bono; viz. the year is probably like to be fruitful in producing many children, and they lively and healthful, women will be safely brought to bed, they will not be subject to abortions (unless to a few casually) and that the Nobility and Gentry shall generally have their Rents well paid by their Tenants or Farmers, and great profit or gain generally in all their domestick affairs. We proceed to mention what sicknesses may be contingent, or are probably like to afflict the generality of mankind in this year 1676. in the Spring or Summer quarters, there succeeding an Eclipse this Summer, which we shall also treat of.

For as much as *Saturn* is Lord of the 6th, and in a fixed Sign, and also \S , Lord of the 8th house, now posited in a fixed Sign, and personally in the sixth house, we may from hence give indication of long-lasting and stubborn diseases, or of such as shall have long continuance; for we fear much of the last *Comets* signification remains yet behind as concerning humane infirmities, and may in one kind or other manifest themselves in this year 1676. Diseases appropriated unto *Saturn* as now posited and aspected by the lesser infortune *Tory Mars*, are generally the distempers of the Spleen, Quartan Agues, Leprosies or scabbiness all over the body, or in most parts thereof, Rheums, consumption of the Lights or Lungs, black and yellow Jaundies, Palsies, whereof many have suffered whilst H was in *Aries*, dry Coughs, Kings-evil, Quinsies, and such other diseases and infirmities which proceed or are occasioned from cold humors. As \S is posited in an aery Sign and in the sixth, he denotes ebullition of cholerick blood, hot burning Feavers, obstruction of the Gall, abundance

Astrological Judgments.

dance of red Choler and blood, the Hip-gout or Sciatica, the running Gout, or that which afflicts the Joynts, the stone or gravel in the Kidneys, Madnes, Tetters in the face, or heat breaking out in several parts, falls from horses and from high places, the *French Pox*, Gonorrhoeas, diseases now in request. As the Sign *Virgo* ascends in this revolution, it usually signifies griping of the Guts, which in some years last past hath been very frequent, many being miserably tormented with it, and so it may be in this year 1676. very many where we live have been sorely afflicted with Dropsies, Tympanies, and other strange and not usual diseases even unto death, by swellings and humors, and *Moles* in their privy parts, or lower parts of the Belly; but none being imbowelled, the perfect disease or true cause thereof, or of those unnatural *Tumors* or humors could not perfectly be discovered, some supposed false conceptions, or abortions might procreate Ulcers in those parts, from whence death followed.

The Planet *Mercury* being Lord of the Ascendant, Retrograde in the 8th house, and in *Aries* within *Orbs* of the * of *Mars* in the 6th may signify defaults in the head and brain, decay of memory, fantasies, vain imaginations, affliction of the Spirit, Madnes, by infection of the brain and cholerick humors lodging in that part, deprivation of common sense, Lethargies in this year as well as *Saturn* two years since being in *Aries* did, impediments in the tongue so did he also in the year 1674. afflict many with loss of speech, by reason of some defect in their tongues. But all or most of those we had occasion to know, who had timely and convenient Medicines, recovered their speech, some totally, others imperfectly, and by non-observance of such remedies as were prescribed. *Mercury* denotes the Falling-sickness, in youth many times curable, in old folks only palliated, but rarely cured, Catarrhs by means of abundance of moist humors lodged in the head. We have ended our discourse upon the *Suns* Ingress into *Aries*, and may affirm, that most material and significant Actions signified

Astrological Judgments.

Argol writes underneath the Scheme of the preceding Eclipse; *Morbili hac aetate & Variola*: this is all the Judgment that Learned man delivers upon this Eclipse, and no more, viz. *Small Pox and Meazles in this Summer*. His Judgment seems most rational; for *Mercury* being Lord of the Eclipse, and in a manner wholly of the Ascendant being in ♄, the house of the ♃, and terms of ♄, in the ascending part of Heaven, and in few degrees of the Sign doth most judiciously signifie children and youth, and the same infirmity he mentions—

As in all Eclipses, so in this, let us first discern what Kingdoms, Provinces, or Cities are like to be passive in this Eclipse. *Gemini*, wherein the Eclipse is, *Virgo*, *Pisces*, *Sagittarius*, have of Kingdoms or Countries these assigned viz. *Lumbardy*, which is a part of *Italy*, *Brabant*, *Flanders* West and South-west of *England*, the Southern parts of *Greece*, *Croavia*, the *Island* of *St. Christophers*, *Ukrania* the South-west; but more naturally all *France*, the City of *Paris*, *Lyons*, *Virginia*, *Tboloufe*, *Heidelburgh*, *Basil* in *Switzerland*, *Spain*, *Hungaria*, that part which belongs to the *Emperour* of *Germany*, *Sclavonia*, *Moravia*, *Dalmatia*, *Cologne*, *Narbon*, *Stargarde*, a great part of the *Low-Countries* or part of *Flanders*, *Calabria* in *Sicilia*, all *Normandy*, *Rhemes*, *Wormes*, *Alexandria* in *Egypt*, *Ratisbon*, and many other Countries, Kingdoms, Cities, and Towns not yet assigned to any particular Sign of the Zodiack, by the neglect of former Astrologers, who lived in the times of some publick Calamities.

Secondly, we are to inquire, when the effects of this Eclipse shall begin to operate, and how many years those effects shall continue.

The middle of this Eclipse or greatest obscuration will be in the M. C. therefore the accidents thereby signified shall be splendid or in great vigour, and manifestly be apparent, in or near *September* and *October* following, and thence forward during the months of *November*, *December* and *January* succeeding, and after those months the effects

Astrological Judgments.

24

Effects shall decline; for as the duration of the Eclipse from the beginning to the end is 2 hours and 33 min. so the effects more or less shall operate two years, one half and some few days. But usually it hath been observed, that the effects of Eclipses do sooner take place, than this doctrine of *Ptolomy* assigns; of which we could in our own experience give many pregnant examples and proofs. The Eclipse it self being in *Gemini*, an humane Sign, it denotes the effects shall manifest themselves upon *Man* and *Mankind*; and as it is in the M. C. whole *Kingdoms*, *Cities*, and *Countries*, *Kings*, *Princes*, *Nobles*, persons of Quality, and men of more than middle age shall be passive, great *Officers* in the Courts of *Princes*, and other meaner persons who have publick Offices or Charges in *Commonwealths*.

It portends famine, scarcity, most violent and fierce sicknesses, pestilent diseases (if not the Plague) stormy high winds, prejudicial to mankind both by Sea and Land, blowing down or overthrowing trees by the roots, and houses to the ground. As it falls in the last Decanat of *II*, it prenotes the death or downfall of some very great person to follow within the time limited for its events: various and sundry losses or detriments unto the State publick in those parts where the effects shall operate, much Action or Trading to little purpose, *Commonwealths* or *Merchants* weary of ill *Creditors*, or that great Consultations shall have no happy progress, or seldom conclude to their own satisfaction, it's the nature of *Mercury* to deal ambiguously in all things, as well in Actions as Consults. Men of superior condition or of power may grant their *Commissions* to inferior persons, but not expect any effect of such *Commissions*, or have any material account thereof or to advantage. Here is like to be much prattling, but little of any sober action to succeed: all things are moveable and mutable, and so are mens minds for a time; verily if we consider the *Asterism* in which this Eclipse manifests it self, viz. in the last *Asterism* of γ , which is from

Astrological Judgments.

from the beginning of Π unto the 25th degree thereof, in which space the Hyades, Horns of the Bull, solely of the nature of *Mars* are, also the Buckler, foot, and left shoulder of *Orion*, of the nature of β , γ , δ , & ϵ , we may not wonder at the great variety of Actions like to succeed this Eclipse, or at the Lightning, fire or fires, Thunder in the Air, and Whirlwinds in the fancies of men expectant from hence. Or if we consider the Asterism wherein *Mercury* is, who is Lord of the Eclipse, by position in the 2. degr. and 50. min. of *Cancer*, which Asterism begins from the 26. degr. of *Gemini*, and ends in the 6. degr. of *Cancer*. The Stars therein are moist and harmful, yea in these our days and times; therefore we the more consider *Mercury* as he is Ruler both of the Eclipse and Angle succedent, and his inclinations or significations generally or particularly as in our Figure. These are to be judged as he alone governs, *Et pro natura Stella cui magis configuratur*, viz. according to the nature of the Planet or Star with which he is in Configuration or Aspect: he here very swiftly applieth to the Opposition of *Jupiter*, now Retrograde and in his fall. A Planet Retrograde represents an infirm person, in confusion, full of fear and care; genuinely this signifies the wilfulness of many persons inclined and intended to impede the general Affairs, or Councils or Assemblies of many Kingdoms, Countries, Provinces, Cities, and Corporations, and this under a subtil pretence of Conscience; but hereby they displease and disoblige their Superiors or prime men in Authority: for *Mercury* himself is an inferior Planet; but *Jupiter* who is passive, represents great Officers, Nobles, Councillors, Judges, Bishops, Ecclesiastical persons, principal Magistrates of Cities, Commonwealths, Provinces, &c. *Mercury* only now in *Cancer*, shews the common or vulgar man, if not the rude multitudes. Here follows the inclination of *Mercury* as in our Scheme posited, a most impetuous person of his natural inclination, fierce and rugged, efficacious, or always at work in his fancy, willingly accommodating himself to any

any Novelty, one that naturally inclines to thievery ; if a Seaman, then to *Piracy* ; an encourager of divisions, subtil in performing what he intends ; but as unto sicknesses and infirmities, he signifies the Phthisick, Consumptions, short breath, weakness or consumption of the Lungs, he incites to Heresies, to Schisms, new-fangled Opinions in Religions, to alteration of old Customs, to new expositions of places of Scripture, usually he is no friend to the Revenues of his Prince who gives him protection, he stirs up great controversies in the Customs, Laws, Priviledges of the people, pretending Christian Policy in all his dissembling actions, &c. Such like men or actions equivalent or like these, may appear or manifest themselves during the effects of this Eclipses continuance, whereby many times the publick good is neglected. These Judgments may be very apparent in many Nations and Countries nominated already, we hope very little in his Majesty of great Britain his Dominions ; for as in the last year, so also in this we affirm, the more grand Actions or mischiefs of what kind or nature soever, are not threatened or signified to have male effects in *England*, no nor during the whole Reign of *Charles the Second*, present King of great Britain. God preserve *London* from further fires, and increate the Trade thereof, the Commerce thereof *ad infinitum* —

Although the latter degrees of *Leo* ascend at the middle time of the Eclipse, yet we must not collect the *Sun* his dignities, or make him significator of the kinds or qualities of the Events succeeding ; for the *Sun* and *Moon* being Governors of the Planets, and the principal cause of Events, commanding the power of the other Stars, do either confirm or destroy the virtues of the predominant Planets, &c. *Saturn* being posited in M. C. and with *Caput Medusa*, doth certainly declare high and stupendious matters or transactions to be on foot in the Courts or Councils of Kings and Princes, and in their Affairs ; he, viz. h is in Δ to v Retrograde, what may be the meaning

Astrological Aphorisms.

ing hereof, but that strong application will be made to some great King, either for immediate assistance or reconciliation betwixt himself and a more potent Prince his Neighbour? but H is a slow Planet, tenacious, will keep what he hath, 1672. is past.

Choice Astrological Aphorisms not hitherto published by any person, wherein is briefly comprehended the whole Mystery of Annual Judgments of Mundane Affairs, now freely communicated to all grateful and industrious Sons of Art, by the Author William Lilly.

1. **H**E that would judiciously consider the Annual and Monthly Contingencies or great Concernments of the World, it is necessary in the first place, that he understand the Natural and Accidental signification of every Planet both in the *Macrocosm* and *Microcosm*.

2. He must also have a certain *Epoche* or *Radix* from whence to derive, first his greater Judgment, secondly his lesser Judgment, when he intends a serious Discourse.

3. The *Artist* must know how to vary the *Planets* significations according to the year wherein he writes, having still a regard to the *grand Epoche* of superior Conjunctions or Comets preceding.

4. He should (if possible) attain the true time or positive Ascendant of the *King* or *Prince*, in whose *Dominion* he shall write, and the Ascendant of that Kingdom or Principality, as also the Ascendants (if they may be obtained) of most of the great *Cities* and *Towns* Corporations therein, and the Nativities of those Officers who are of most Authority, or regulate the then present Affairs under their *Prince*, as also the Nativities of most *Christian Kings*, or of all *Europe*, with the *Directions* each King hath operating every year, &c.

5. Of *Epoche's* or *Radices* the *Astrologer* ought seriously to consider the first great Conjunction of the superior Planets,

Astrological Aphorisms.

ess, Saturn and Jupiter, when they leave one Trigon, and enter another, and curiously observe the main design of that Conjunction, and how it agreeth with that present time, or what material change is in any Nation, or what new Dominion, &c.

6. Every succeeding Conjunction, from the first to the last, or unto that time the Astrologer writes, and more especially that Conjunction which last preceded the time of his writing, ought to be warily considered, and also how it differs essentially from the first Conjunction either in unity or discordancy.

7. The several Conjunctions of Saturn and Mars, and Jupiter and Mars succeeding the last Conjunction of the Superiors, and either lately preceding, or presently succeeding the time of the Artists writing, must be carefully observed in Judgments; for the great Conjunctions may aptly be compared to a Tree, and the lesser Conjunctions to the Branches.

8. The true place, viz. sign and degree in the Zodiack of any New Star, Comet, Stella Crinita, or Miraculous Apparition, ought to be had (if possibly it may be obtained.) If the degree cannot be procured, yet the sign wherein any such Phenomena appears, must assuredly be known, and as near the degree thereof as may be. For though Philosophy and Philosophers teach us, that Comets have a matter or Ethereal substance, of which they are created, yet those Learned men wanting Angelical conversation, are deceived. For how should it come to pass, that a rude Matter from which they say Comets are derived or created, should put the Comet into such or such a form, and cause it to be either Direct or Retrograde, or the Tail thereof to be of one colour in some Comets, and different in others, of such a magnitude, form, or length, and to vary in motion to the several quarters of the Heavens, where the effects do ever most certainly succeed either for good or ill? Therefore the secret Learning of which few of the Ancients had any knowledge is most to be adhered

Astrological Aphorisms.

red unto, but rarely to be communicated to Mankind but this is *obiter*.

9. The *Ancients* do enjoyn us seriously to consider present *Solar* and *Lunar Eclipses*, and there is something therein to be considered; but in reality I declare, The nothing of that powerful efficacy ever appeared unto as they have delivered and given caution of, I mean *Eclipses* operate not with that violence, or so terribly as the *Ancients* have recorded and left in their Writings to Posterity, however they are with moderation to be handled and the very truth is, they do rather work generally than particularly.

10. Consideration ought to be had, (in judging of general Accidents of the World) what fixed Stars of the first or second Magnitude are near the place of any greater or lesser *Conjunction* or *Comet*, *Stella Crinita*, or unusual Apparition, and whether their *Destination* or *Latitude* North or South, as also the colour is to be observed, and what little fixed Stars are near them, with the *Constellation* or *Constellations* these Apparitions possess: In these things great circumspection and care ought to be taken.

11. Nor are the *Secundian Intelligences*, viz. what *Angel* then governs, to be omitted in consideration, for in judging of future Events, as to search when he began his Dominion, and how many years since his Government; for there is a very great Mystery in this; *Tremellius* his measurement of time in those matters, doth excel all that I have seen, and it doth concur with the Opinion of the most Learned Rabbins; but they were too much superstitious in their application. His Measure or Limitation of time was deduced from certain or assured Revelations; other mens conceits are only conjectural, and have no true affinity with verity or experience. Herein the true understanding of the Assignment of the *Planets* and *Signs* to particular *Kingdoms* and *Countries*, or Communities of Mankind, will much avail in giving Judgment.

12. Now in order it follows, that the *Astrologian*

Astrological Aphorisms.

also consider the *Essential Fortitudes* of the *Planets*, the *Superiors* especially; for all those *Planets* that are below the *Sun*, viz. *Venus*, *Mercury*, and the *Moon*, do not occasion any great Mutation in the World, they do sometimes for a while put great Actions forward, and at other times retard them, but always without violence.

13. In the Consideration of *Essential Fortitudes* in some matters, the *House* of a *Planet* ought to be preferred before the *Exaltation*. For this is certain, that *Matters*, *Things*, *Governments* erected when the principal Significator is in his *House* or *Mansion*, do endure longer, and more firmly, than when the Significator at the time shall be posited in his *Exaltation*; for then those matters, viz. new erecting a Government, City, Family, &c. do continue but for a short time with much *pride* and conceited estimation and *Fame*, &c. rather than sober reality.

14. As in taking the Fortitudes of the *Planets*, great care ought to be had, so their Debilities must be observed with no less care and prudence; wherein I advise you to beware of the Effects or Influence of a *Planet* when he is in his detriment, rather than when he is in his Fall. For a *Planet* in his detriment is like a person cast out of all his Estate without hopes of Recovery, whereas the Fall shews but a present subjection unto a misfortune with hopes of Recovery; but these things are only introductory.

15. Above all things, let the Artist rather judge by the strength of his reason, guided by Art, upon the Configurations of the *Planets*, than by ill digested *Aphorisms* laid down by some Authors, which if not judiciously applied in Judgments, rarely hit the white, or speak truth; and therefore 'twas judiciously written by *Ptolomy*, *A se & scientia*.

16. Be conversant in precedent Histories, and therein observe either the great happinesses or calamities that have befallen any Kingdom, Country, or People, and in what year they manifested themselves; then also observe what *Planet* in those times was most potent or essentially dignified,

Astrological Aphorisms.

fied, or the contrary, what *Comet* or Blazing-star preceded, and the Sign it appeared in, what greater or minor *Conjunction* was then in force, also what Eclipses, &c. accordingly frame a Judgment, &c.

17. It is observable, that Calamity or Misery never afflicts any people, but *Saturn* hath a strong hand in it; peace and plenty proceed in a natural way from the Influence of *Jupiter*, Commotions from *Saturn*, the *Moon*, and *Mars* Wars from *Mars* and the *Sun*.

18. The Lunations preceding the Change and Full Moon concurring with the Figure of the Change and Full Moon near the time of any great and notable Transit, eminent *Conjunction* or Opposition of the superior Planets put Designs then on foot into present Action, and with much secrecy, if it have signification in the Change; but publicly and openly, if those Configurations happen at or near the Full Moon, and the figure thereof correspond to the aforesaid.

19. The Signs of the Zodiack are seriously to be observed; for *Aries* is violent, *Libra* is moderate, *Cancer* is sudden, *Capricorn* is slow, *Taurus* is heavy, *Gemini* is nimble, *Leo* is valiant, *Virgo* is barbarous, *Scorpio* is false, *Sagittarius* manly, *Aquarius* sober, *Pisces* cowardly. Of all the Signs in the Zodiack, *Cancer* is the most impetuous as to Commotions and shedding of Blood without mercy, for that Sign *Hercules* and the two Dog-stars are located.

20. Great Actions are usually prefignified by the superior Planets ♄ , ♃ , ♅ , and ♁ , and petty matters by the inferior ♆ , ♇ , and the ♁ . *Saturn* in *Aries* denotes high matters transacted with fear and care; in *Taurus* with great labour to no effect; in *Gemini* with much speed to little purpose, &c. an ingenious Artist will find out the rest.

21. There is in the Art of Astrology (which some ignorant persons are pleased to vilify) *Arcanum quoddam* equivalent to Prophecy; but so distributed to man by the Almighty, that he cannot easily communicate his knowledge

edge or conceptions therein to another, and yet it is attainable by prayer and the assistance of the *Divine Genius*.

22. When and at what time the *Divine Genius* invites or secretly prompts the Understanding to curious Notions, observe that time, (*viz.* the Ascendant of the Figure of Heaven for that moment) and how the *Moon* applies; or whatever concerns those Notions must be farther agitated, written, or studied when the *Moon* is in a *Sextil*, or rather a *Trine Aspect* to that Sign she was in at that time, and if possible, with that *Planet* who was then Patron or proper Significator of those conceptions, and this is something near attaining *Prophecy*, if rightly understood. Above all things serve God: *Astrology* is attainable by prayer and industry, especially by such a person that hath a natural propensity to the study thereof. These Notions were written without any assistance or inspection of a Book, and will bear or require a Commentary thereupon.

ADVERTISEMENT.

Whereas there was lately published to the World a Pamphlet in Vindication of the Sign *Scorpio*, by an ungrateful *Scorpionist* J. G. a Pretender to *Astrology*, wherein he hath most unjustly and very unworthily abused our Person and Reputation; This is to signify to the World, that we are altogether innocent of this impertinent Authors Egregious Calumniations, and look upon him far below us to respond to his malicious, vain, and ridiculous Forgeries, which is all the Answer he may expect from his Quondam Master

JANUARIES *Observations*. 1676.

A Friendly trine of the two superiors ♄ and ♀ begin the year; aged Councils or Counsellors not much respected, or their advice followed. Great Assemblies appear in sundry Nations, but many of those intrusted, appear with premeditated intentions, subtil inventions, rather giving impediments than any forwardness to the present Actions in hand; *Rabbi*, *self ends*, ambition and vain glory, puffs up the spirits of divers, so that no happy conclusion succeeds these consults—The *German* Emperour procures many Friends or *Allies*; seemingly his Affairs prosper. Great hopes of prosperity in the *Irish* Affairs, and of good returns from the *West Indies*, *Barbadoes*, and those other Plantations: probably some worthy *Prelate* advanced to high dignity, and some wise and prudent persons made Counsellors, or moderators of some present impending differences. The nimble *Mercurians* act their parts with intention to stir up the people to mutinies, by lying and scandalous Pamphlets; some discovered and punished accordingly—Little divisions amongst the Religious, or such as pretend thereunto. Preferment in parts transmarine bestowed on a deserving Military man, or a new *General* elected: here is not manifested any *Martial* Action. Many Merchants ships seem near this time to return with good profit to their Masters or Owners. The *Spanish* Affairs somewhat doubtful at present, but these near *Italy*: A great Marriage in some forwardness, occasions much jollity.

FEBRUARIES *Observations.* 1676.

MAny Actions or publick concerns having had a beginning in *January*, may have effects or conclusion in this. The designs of malapert spirits are to cast aspersions upon their *Princes Actions* and *Honour*, and to divide the *Nobles* and *Gentry* of *Nations*, and bring them into *Factions* — We hope God will direct the *Polonian* and *Swedish* Affairs in this and every month, for safeguard of their *Kingdoms*. Plenty of Intelligence, seemingly good for *England*, doth now or near this time arrive, we hope it may be for the great comfort and satisfaction of his present *Majesty*. We hope the Merchant may expect good returns from *Portugal* and those adjacent parts; that Kingdom seems in a good condition, — News may be divulged of some sinister Action lately happened in *Ireland*, or something to that purpose. *Poland* we may fear to be in danger if the season of the year permitted Action, but here is appearance as if those people either had made, or were upon Treaty with their Enemies. There doth appear as if some high Animosities were ready to manifest themselves, but there is also hopes of prevention whatever danger might from thence ensue: probably there may be some petty or small *Ran-counters* where Soldiers are nearly quartered: *Alas*, a person expecting Preferment, or to be advanced higher, falls short of his ambitious ends.

THE Affairs of *Princes* do slowly proceed, and their general Affairs kept very private; many complain to have suffered, *Mærorem & tristitiam ab amicis & causa amicorum*; viz. sorrow and vexation from their Friends, or for their cause much torment some Eminent Persons near this time; for many months past *England* seems not to have been so much troubled with lewd Pamphlets, idle reports, and causeless or unnecessary *queries* or *disputes*, and these raised purposely for mischief, and to affront their Superiour or Superiours, to scandalize and undervalue the *Nobles* and greatest Persons of *Nations*; we hope *England* will be free of such giddy headed *Monsters*. Near this month various reports of losses at Sea from several parts, part of them may be true, but not in quantity to the relations; An appearance of very happy intelligence unto his Majesty from parts beyond the Seas, and of good news for the adventurous *Merchant*, of the safety of his *Majesties Irish* Subjects, and the good condition or welfare of the *English* Plantations in the *West Indies*. Many *Princes* in great want for supply of their emergent necessities, find much unwillingness in their people to furnish them—— *England*, *Denmark*, *France*, *Burgundy*, much concerned in the affairs of this month; so also *Swevia* and *Polonia*—— The *Muscovite* in a deep study how to keep himself or people from doing much good to his Friends, or any mischiefs to his Enemies.

April

April hath xxx days.

The daily Motion of the Planets and ☿.

APRILS *Observations*, 1676.

THE Planets now are all direct in their motions, which may signifie the celerity and activeness of the Princes of this world in their now proceeding; but these seem rather preparations or provisions for men and money than probability of any warlike Actions. The *Confederates* beyond the Seas seem to have many meetings or assemblies, or many sober and wise or deliberate *Consultations*, how and by what means to prevent their Enemies, and how best to contrive for their own advantage— they are like to be potent when time shall serve: If some designs fail not, the *Monarch* of *France* will also well provide for this succeeding *Summers* work; an *Oak* is not hewed down at one blow; doubtless, both *Hollanders* and *French* make large or vast preparations for the Sea, and strong *Fleets* are like to be set forth this Summer; we cannot without *Angelical* Revelation, excogitate any present reconciliation, but, that a War, and probably that to be the most bloody of any that hath been since the beginning. Some fear the *Plague* or the *Sickness* in this year. In *London* we find no great signification thereof, rather violent *Favours*; His Majesty enjoys health, and finds himself in much estimation in Foreign parts, and a perfect understanding betwixt him and his people— here may be signified some small Losses to the noble *Londoners*; and many inferiour people complaining for want of Trade. Much ado for great Assemblies to agree or unite in judgment; some petty divisions arise, fomented by hot spirits, but a little time reconciles them.

May hath xxxi days.

25	e	
26	f	Term begins.
27	g	
28	a	
29	b	Carolus II restoration.
30	c	
31	d	

Near this time there may appear some *Contraversion* or *Difference* between the *Confederate parties*, but soon after reconciled; in this Month it will be evident what kind of *Sicknesses* shall afflict mankind this Summer. Large preferment is bestowed upon a Person well deserving it, and more honours are conferred upon several worthy Commanders in *Germany, Suevia, France, Denmark*. Probable it is, the present War will proceed with vigour and in good earnest; for it is manifest all Nations concerned herein are making large preparations; some for Land-service, others for Sea-affairs—Moderate Intelligence comes from *Poland*; we doubt there is no happy concord among those distressed people, or in their perplexed *Councils*. The *Emperour of Germany* finds assistance beyond his expectation, whilst the *Allies* of another Prince seem either to fail, or not to answer Articles formerly concluded. Affronts or Neglects do seem to displease many active spirits who have not preferments according as themselves think they merit—Dissention in great *Councils*, hot disputes, long animosities appear near this month: Both pleasing and unpleasing News arrive both at one time; fiery and zealous spirits begin to act their parts; nothing will give content, except what they would have been assigned them. People generally dissatisfied, in many places high words, if no Insurrection follow. But a *Solar Eclipse* being at hand will manifest the matter.

June hath xxx days.

29	e	St. Peter Apostle.
30	f	New Moon 21 min. past 11 at night.

THE effects of the *Eclipse* operate not presently, yet a little appearance thereof may be; by means of the intemperate passions of some pretending unto Religion, words are usually *Semina-ria belli*, but no such thing as War threatens *England*; rather sicknesses, private and publick divisions, misunderstandings betwixt wise and judicious Persons, these fomented by intemperate Persons purposely to do mischief. The opposition of *Jupiter* and *Mercury* in moveable signs, denote this heat and fury amongst the *Grandeers* will not be long lasting — Part of this judgment will be manifest amongst the great Persons of *Scotland*, amongst the *Hollanders*, and will reach the *Argier Pyrates*, *Tunis*, and other *Pyritical Corsaires*; amongst which people there will about this and other subsequent months appear many *Mutinies*, *Insurrections*, and many *changes* in their Government and Assemblies. Probably there will be near this month *Sea-Fights*, or great disturbances to the Merchants and their Ships at Sea, and this Northward, or in the *Baltick Seas*. One or more *Ladies*, or such like, seems very pensive and much tormented by reason of scandalous reports reflecting upon her; (*Caveat emptor*) let the first relator be wary — Again, there are like to be high Controversies in *Scotland*, either amongst the *Nobility* of that people, or with many of contrary judgment in Religion. The Clergie in many Nations not much honoured, are discontented and vexed with several malapert Sects of men, professing contrary judgment and tenent —

JULIES *Observations*, 1676.

THE *Armies of Kings and Princes* begin to be near each other; a Battel or Fight is intended, and probable it is, there may be great slaughter of *Christian blood* about this time or in this month, as also some very considerable City or Town taken, and great spoil made thereof. Very high advancement conferred upon an eminent *Martial Commander* for late and present Services perform'd. The *Spaniard* having now more assistance of men and money than expected, advances to purpose in the *Confines* of his Territories in *Flanders, &c.* but in *Sicilia* the *French Monarch* seems to get ground, if he can preserve it; A sad time and deplorable is at hand, intimating *Captivitates, injurias, malorum licentiam & magni alicujus viri mortem*; *Captivities*, or many Persons taken Prisoners, many *Injuries* or *Insolencies* committed, and the death of some great Man: In many Countries great mortality of Cattel follows, what the mortality leaves, the hungry Soldier seises upon; a very uncomfortable time for the *Boars and Clowns* in those Countries where War is: *Poland* especially is menaced by intrusion of a *Barbarous Enemy* into that Kingdom; some part of the evil may surprize the *Muscovite* his Territories. Various News from *Italy* and those parts, nothing certain or to be credited; The *Virgin* yet holds up her head, but more faintly than formerly she cries, *Deus in adjutorium.*

IF those so considerable Actions mentioned in July, had no manifestation therein, we may then expect them in August; and very probably upon the * of ♂ and ♀ in this month, for ♀ is now direct. Intelligence arrives from the *Eastern* parts, from *Italy*, *Spain*, *Sicilia*, *Turkie*, yea from *Rome*; it should give notice of many strange actions and passages there and in those parts lately happened. At present the *Virgin* seems to want help; some of her Soldiers turn their heels, and run faster than they fight. Many divisions in *Italy* amongst the Religious, whether *Cardinals*, or *Abbots*, or *Bishops*, or other inferior Princes of those parts. It may be doubted many discontented Persons will be apt to disturb the Magistracy of those Cities they live in; a very mischievous affront being put upon a Lady near this time, begets some quarrelling or Duels: The Soldiers, or their Officers, or Commanders at variance amongst themselves; however many of them exalted to higher Commands, and many *Envoy*s or *Embassadors* do appear to visit the Courts of Princes, to find out their inclinations whether it be to this or that party. — We fear melancholy, a surfeit or some sudden distemper may afflict a great Person of *Europe* near or in this month. Very much Intelligence comes from beyond Seas, from *France*, and from *Germany*, and other parts, much of it very pleasing. We wish the City of *London* all happiness, and hope well of her affairs, *Quoad* the present times will permit.

SEPTEMBERS *Observations*, 1676.

HERE is great appearance as if the *French Monarch* his present Affairs were in very dubious and uncertain condition, and so his constant *Ally* the generous *Swede*; but whether he may blame the *Swede* or not, it may be doubted; it is to be feared there are endeavours to separate the bond of friendship betwixt *Nation & Nation*. Health being most pleasing of any blessing God gives to man, we wish it at present to that or those persons who stand in need of it. Imputations are generally cast upon the honour of his most *Christian Majesty*, but time will best manifest the truth or falseness of those *critical slanders and calumnies*: May his Majesty of *England* be ever glorious in the esteem of his Subjects: *Fiat voluntas Dei omnipotentis*. Many considerable Actions in this month both by Sea & Land; many mournful complaints from the distressed Inhabitants of several *Provinces*, from *Cities* and *Towns*, lately, or now; or near this time, plundered & captivated, of which very plentiful Intelligence arrives in *England*; several Insurrections, Tumults, or Mutinies, are made more than usually have been; for *Mars* now transits the sign and degree of the late *Solar Eclipse*—Great motion of *Armies* over Rivers, or in moist places, and many fights at Sea in or near this month—*Saturn* becomes Retrograde, the Country man complains of his loss of *Corn & Cattle* this Summer, very like to be jangling or wrangling in words and deeds betwixt two great and famous *Kings* or *Princes* of *Europe*. Many are the Feavours & other grievous Maladies that afflict the common people near this time, more are behind: But Peace being in *England*, let us pray & give thanks. E 3 Octo-

THE turbulent sign m ascended at the \odot entrance into \sphericalangle , the *Angles* of that Figure fixed; the Lord of the ascendant removing out of one sign into another, manifests the sudden motion of Armies or Armed men out of one Province into another; it denotes the vulgar Man or Clown so tormented with poverty and oppression, that he is enforced to leave his present habitation, and to seek for better peace or content in remoter parts, or places more pacifical; and it is signified, that notwithstanding the great Plunder many of the Soldiers have made, and whereby they have enriched themselves; yet, *perdent eas post acquisitionem earum & cadent in paupertatem atq; indigentiam, cadent in opprobrium atq; vituperium valde turpe atq; reprehensibile: viz.* Not only the Soldier but those who have got so great wealth by oppressions, shall lose or waste all again, and fall into poverty and indigence, into disgrace and scorn very filthy and reproveable—As h is in the 7th. house, *Ut multum significat detestabilem faciem verum*, h as posited, manifests a detestable end of most matters acted or acting this *Autumnal* quarter: be it as it may be, the *English* are not concerned herein, for they may hope at present for more than ordinary unity amongst themselves, and be glad and joyful for that great renown and estimation their King hath from all or most *Princes* of *Europe*, yet there is denoted unlucky or not pleasing News from the *West Indies*, or of those Plantations *Westward*: and of some present differences like to be contingent in or near this time; for v like a bloody malicious *Tory* is in m —denoting many slanders are cast upon deserving Persons, and they all untruths; for v in m being reporter or divulger thereof, no credit is to be given thereunto—however the month seems to end pretty well, except news of some storms which may have prejudiced Ships at Sea.

THE month begins with unusual turbulent weather, with great animosities amongst superiour Persons, with more than ordinary vexations in the Courts of *Princes*, and Courts of *Judicature*; these in *partibus septentrionalibus*, these in the Northern parts; *significatur, Naufragia repente venientia*, Shipwracks suddenly happening; *Rixam atque contentionem atque bellum in partibus occidentalibus*, Brawling or contention, and War in the western parts of *Europe*. Oppressions & Taxes will occasion much unquietness in many Countries: the sicknesses of this time very grievous, and long lasting. *Tory* ☿ becomes *Retrograde* in ☿: the *Hollanders* are threatened with many losses at Sea, by reason of storms and violent winds, when least expected. A third Trine of ♀ and ♃ is the 17 instant; of which and the two preceeding Trines of these superiours, you shall hear the learned judgment of Mr. *Richard Edling*, Printed 1664. a most judicious piece it is: He saith, *These benevolent Aspects of the superiours ♀ & ♃, would very much excite the minds of men in authority to Peace and Amity, to a full composition of the most grand differences that are now or lately have been; but some controversies or difficulties do often intervene, so that the hopes of a period of those combustions and molestations that have lately been in several parts of Europe, do go on but very slowly, and things are with no small difficulty performed*— Thus he of the year 1676, a more sober piece of *Astrologie* was never yet printed by any of the Ancients— ☿ now *Retrograde* in ♀ doth nothing but placet or write scandalous Libels, to the incensing of many unquiet resolutions of airy fancies—

Nota. ☿ ♀ ☿ hoc mense, ♀ in 23 ☿ ☿ in 23 m—

DECEMBERS Observations. 1676.

Autumn continues retrograde, so also *Mars*, the month begins, (the time of the year considered) with moderate weather, inclining to wet or moi-
sture by rains or snows: As to mankind in general, we now labour under many afflictions, great men all at variance one with another, the people much dissatisfied; many Princes find their Subjects willing to begin Insurrections; unwonted Discords arise amongst the Nobles of Nations; *Multa infirmitates, & mors in hominibus, cum multis pluvii.* Many infirmities, many men die, many showers or much rain or snow. Many Rattles seem to attend the *Hollanders* in this Winter quarter, and near this time. According to the season of the year here should be some more than ordinary Action at Sea, or more shipwrecks than usual.

We conclude and say.

Multa sua praeiens nobis Deus exhibuit ira

Symbola; judicii multaq; signa sui.

Pena aliqua saltem parte levemus onus—

Amen.

God bless *Charles* the Second with long life, for good of all his Subjects.

Advertisements.

AT the Royal Oak in Still-yard upon Great Tower-hill near the Gun Tavern, Lives *Lancelot Giffon*, Practitioner in Physick, who speedily cures all such persons that are afflicted with Distempers (whether incurable) which he resolves upon the life of the Patient. He also sells the True *Elbow Proprietary* at 5 s. the Ounce, and 2 s. the half Ounce, ready weighed and set up in Glasses for all those Persons that shall come or send for the same, with an account of its virtues, and directions for its use.

SINCE many reports are spread abroad that I am *Inter-
mittent*, I thought it convenient therefore to give the
World an account of my late Recovery and Infirmary which
began August 10. 1694. First there was an appearance of
Red spots all over my Body, together with an Itching and
little Pustles upon my head; I conceived the distemper
might be partly *Scurvical*, or a general Infection of my
Blood, and therefore I took *Antiscorbutical* Medicines, and
in *October* I applied *Lecches* to the *Humils*, and shortly
after opened a Vein; but could not bleed two Ounces;
Upon the 20. of *December* following, from 8 at night till the
next morning, by a sensible motion a Humour descended
down from my head by my left side and hip, till it fixed in
the calf of my leg for a time, (which was much swelled)
and so gradually to my very toe. In this my sad condition
I sent for Mr. *Thomas Agar* of *Kingston upon Thames*, a most
skilful, judicious, and honest *Chirurgien*, who after applica-
tion of *Pulvises* 6 days, conceived it fitting then to *lance* my
foot in two places, which he effectually performed, and
used such means by the application of *Pledgers* to the part,
that he prevented either *Mortification* or *Gangreen*, and in 5
weeks time, by Gods blessing, he effected my Cure, so that
I could then walk without Crutch or Staff. I give God
praise for his mercy unto me in blessing the means that was
used, and I cannot but own Mr. *Agars* Industry and indefatigable
pains and skill of whom I will write nothing but
the truth, viz. That he hath performed in these parts many
Admirable Cures in *Chyrurgery*, in which he is not only ex-
pert, but careful and exact; and I can truly affirm upon my
own knowledge, that in his Practice or Profession of an
Apothecary, he is no less curious in the composition of his
Medicines with sound and uncorrupted Drugs, by which both
Rich and Poor may receive much benefit.

THE true *Elixir Proprietatis* and its perfect use in most
Diseases, is composed and sold at the Sign of the *Van
Helmont* in *Heydon-yard* in the *Minories* against *Heydon House*,
also at Mr. *Robert Horns* at the *Horn* in *Cornbil*; at Major *Nathaniel Brooks* at the *Angel* in *Cornbil*; at Mr. *Hancocks* at the
Three

After Ward of Louisa near Windsor, Surrey, call for
form artificially the Conveying of Water either by
Canals or cutting New Rivers (in any places where it
is possible to be done) likewise can build new, or repair old
bridges over Rivers, and undertake the New building &
reparation of Water Mills, or any Water works, the Build-
ing of Bells, Dredging, Surveying of Lands, Cutting of Va-
les, &c. The last lately invented an Engine for the Pump-
ing of Water, which by the Assistance of one man (only)
will raise one Foot of Water in one Minute (as hath been
experienced at St. James's Park) and is well calculated for
the Raising and Drawing of Grounds, Fens, Lands, &c.
The Engine is sold for Eighteen shillings. This Engine will
raise water four feet high and upwards.

1000. In the First and will shortly be made public. *Classical Education*, at the Royal Academy of Arts and Sciences. The School Edition very much improved and enlarged, by the Author's Majesty, and sold by Mr. Thomas Sawbridge in Little Britain, and Mr. William Toole, in the City, at St. Paul's Church-yard. The New American Teachers' Edition, under the Management of the Author in Baldwin's Court, was against the Old Edition, now in Baldwin's Garden, viz. Arithmetic, Trigonometry, Trigonometry, Astrology, Navigation, Drawing, Surveying, Gauging, Measuring, &c. And the Art of Astrology in all its
